

STRETCH-AIR BARS™

Stretch Screen Fabric to Frames of All Sizes

ADVANTAGES

- Power-Grip Cam-Locking Bar: Secures fabric into channel
- Dual Master Control: Displays separate pressure readings for each direction
- Master Control System: Controls up to 20 separate Stretch-Air Bars
- Modular Design: Accommodates any size frame
- Patented angle design: Provides absolute fabric-to-frame contact
- Displays separate pressure readings for each direction of stretch
- Flexible Plastic Air Tube: Maximum of just 30psi required
- Easy setup and operation

The versatile and efficient Stretch-Air Bars system from American and AWT World Trade, Inc. stretches all monofilament and multifilament screen fabrics with speed, accuracy, and precision.

All Stretch-Air Bars models allow screens to be stretched directly from the fabric bolt, eliminating waste and speeding up screen-making production. The fabric is cut from the bolt after it is fully tensioned and fastened to the frame.

Specially-designed bars provide absolute fabric-to-frame contact. Equal counter-pressure is applied to all four sides of the frame for outstanding pre-press accuracy. The Power-Grip Cam-Locking Bar pulls the fabric to the exact preset tension, ensuring repeatability and production quality.
